

SKYWARN Net Control Scripts (1/08 W1CAR)
NCA SKYWARN NET CONTROL SUMMER SCRIPT

If in Watch or "Standby" mode: READ EVERY 30 MINUTES

**IF IN WARNING MODE: READ EVERY 15 MINUTES, BREAKING INTERMITTENTLY
FOR WARNINGS AND REPORTS**

"This is _____ (call sign) Net Control for SKYWARN in contact with the National Weather Service in Sterling, Virginia."

–(IF in WATCH mode)

"The National Weather Service has indicated that there is a THREAT for SEVERE WEATHER within the listening area of this repeater. (Read the list of watches and warnings if possible) SKYWARN is in Standby mode, and the repeater may be used by amateurs. It is requested that transmissions be kept short and breaks given to permit severe weather reports to reach SKYWARN."

–(IF in WARNING mode)

"The National Weather Service has indicated that SEVERE WEATHER IS OCCURRING within the listening area of this repeater. (Read the list of watches and warnings if possible) SKYWARN is currently activated as a directed net."

"All SKYWARN spotters are requested to check their systems and back up systems at this time. SKYWARN HAS BEEN ACTIVATED. All amateurs are encouraged to call SKYWARN with reports of severe weather.

(Read this portion once during an hourly NCS slot, or as deemed necessary by weather conditions or by the Net Manager)

In the event of a repeater outage on this frequency, our primary backup repeaters are either 145.21- pl 141.3 (K4QJZ Linden, VA) or 146.955- (KV3B Rockville, MD). Stations are requested to QSY to the most readable primary net frequency or to the best available subnet frequency."

"When calling SKYWARN Net Control.. please give your Spotter ID if you have one, and indicate the exact location where severe weather is occurring. This includes city AND state, nearest town, road, or intersection. Please do not use landmarks. Major roadways are OK."

"The National Weather Service is looking for reports of the following:

1. Tornadoes, funnel clouds, or rotating wall clouds
2. Hail (please give the size as compared to US currency)
3. Wind gusts in excess of 50 miles per hour
4. Flooding of streams, creeks, or rivers
5. Roads, or streets made impassable due to water
6. An inch or more of rain accumulation (measured in rain gauge)
7. Any damage by wind or lightning
8. Downed trees, large branches, or power lines"

"Please do not call SKYWARN if there is no severe weather occurring in your area. Any station experiencing severe weather call SKYWARN Net Control at this time."

"This is _____ (call sign), over."

NCA SKYWARN NET CONTROL WINTER SCRIPT

If in Watch or Standby mode: READ EVERY 30 MINUTES

If in WARNING Mode: READ EVERY 15 MINUTES, BREAKING INTERMITTENTLY
FOR WARNINGS AND REPORTS

"This is _____ (call sign) Net Control for SKYWARN in contact with the National Weather Service in Sterling, Virginia."

–(IF in WATCH mode)

"The National Weather Service has indicated that there is a THREAT for SEVERE WINTER WEATHER within the listening area of this repeater. (Read the list of watches and warnings if possible) SKYWARN is in Standby mode, and the repeater may be used by amateurs. It is requested that transmissions be kept short and breaks given to permit severe weather reports to reach SKYWARN."

–(IF in WARNING mode)

"The National Weather Service is looking for reports of the following:

1. Snow accumulation in inches
2. Any ice accumulation on trees, streets, or power lines
3. Sleet or freezing rain
4. Wind gusts in excess of 35 miles per hour
5. Downed trees, large branches, or power lines, or any other storm-related damage.
6. Impassable or closed roads"

"Please do not call SKYWARN if there is no severe weather occurring in your area. Any station experiencing severe weather call SKYWARN Net Control at this time."

"This is _____ (call sign), over."

NCA SKYWARN Report Mode Net Script

REPORT Mode = Read informally every 30 to 60 minutes

Opnote: (REPORT Mode is **VERY** informal, and is used primarily for LISTENING for reports. Reading the script is only customary at best and is not time-critical)

“BREAK” (if needed) [unkey]

“This is _____, (call sign) in contact with the National Weather Service in Sterling, Virginia. Skywarn has been activated in **REPORT Mode only**. **Report Mode** is an informal net that is used during severe weather situations that do not warrant a directed Skywarn Severe Weather Net. There is currently no Net Control, but we are monitoring the frequency for severe weather reports.

“The National Weather Service has indicated that there is a THREAT for SEVERE WEATHER within the listening area of this repeater. (Read the list of watches and warnings if possible) SKYWARN is in **Report Mode only**, and the repeater is available for use by amateurs.”

“When calling SKYWARN, please give your Spotter ID if you have one, and indicate your exact location with your report. This includes city AND state, nearest town, road, or intersection. Please do not use landmarks. Major roadways are OK.”

(Read the appropriate table below. NOT both!)

Summer Criteria: for summer Skywarn nets only
“The National Weather Service is looking for reports of the following: <ol style="list-style-type: none">1. Tornadoes, funnel clouds, or rotating wall clouds2. Hail (please give the size as compared to US currency)3. Wind gusts in excess of 50 miles per hour4. Flooding of streams, creeks, or rivers5. Roads, or streets made impassable due to water6. An inch or more of rain accumulation (measured in rain gauge)7. Any damage by wind or lightning8. Downed trees, large branches, or power lines”

Winter Criteria: for winter Skywarn nets only
“The National Weather Service is looking for reports of the following: <ol style="list-style-type: none">1. Snow accumulation in inches2. Any ice accumulation on trees, streets, or power lines3. Sleet or freezing rain4. Wind gusts in excess of 35 miles per hour5. Downed trees, large branches, or power lines, or any other storm-related damage.6. Impassable or closed roads”

“Please do not call SKYWARN if there is no severe weather occurring in your area. Any station with a severe weather report please call _____ (call sign) at this time.”

“This is _____ (call sign), over.”

SKYWARN NET CONTROL CLOSING SCRIPT

Close of the Net

"This is _____ (call sign) Net Control for SKYWARN in contact with the Lead Forecaster at the National Weather Service in Sterling, Virginia."

"On behalf of the National Weather Service and the SKYWARN program, we would like to thank the WA4TSC Bluemont Repeater Group for the use of their system and the amateur community for giving SKYWARN traffic priority and for participating in SKYWARN severe weather nets."

(Read this **ONLY** if the SKYWARN Activation has ran simultaneously with the NVTN)

"We would also like to thank the Northern VA Traffic Net which normally meets on this repeater each evening at 7:30pm for closely coordinating its activities with the SKYWARN Net."

"Please pass all further severe weather reports directly to the National Weather Service by telephone. The severe weather hotline telephone number is **1-800-253-7091** This telephone number is only to be used to report severe weather."

The DTMF code is now entered into the repeater by the Coordinator or Repeater Control Operator to turn off the SKYWARN Net Mode.

"The SKYWARN Amateur Radio Net is now secured at _____ (time) and the repeater is returned to normal service. This is _____ (call sign), clear the frequency."
